---

## PROFILE

Entry-level Frontend / Shopify Developer candidate with a foundation in HTML, CSS, JavaScript, responsive layout, and basic Shopify theme customization. Strong IT Support background with user troubleshooting, documentation, and careful task handling. Currently learning Shopify Liquid, theme structure, product page improvement, landing page development, and basic speed optimization. Willing to start with small real client tasks or a test task to prove ability.

## TECHNICAL SKILLS

<b>Frontend</b>	HTML5, CSS3, JavaScript fundamentals, responsive layout, basic DOM interaction
<b>Shopify</b>	Basic theme customization, product page sections, Shopify theme structure, Liquid fundamentals (learning)
<b>Optimization</b>	PageSpeed Insights basics, image optimization, lazy loading concept, app/script impact awareness
<b>WordPress</b>	Basic WordPress setup, plugin/theme hygiene, security and performance awareness
<b>Tools</b>	VS Code, Git/GitHub basics, Chrome DevTools, Canva/Figma basics, ChatGPT/Codex-assisted coding workflow

## RELEVANT EXPERIENCE

### Technical Support / IT Support Experience — approx. 1 year

User support, troubleshooting, documentation, software/account handling

- Handled user requests and technical issues with a careful troubleshooting mindset.
- Supported software installation, configuration, account/license handling, and issue escalation.
- Documented issues, followed procedures, and communicated clearly with non-technical users.
- Built a strong foundation in Windows, networking basics, Microsoft 365, and IT operations.

## PRACTICE PROJECTS / PORTFOLIO DIRECTION

<b>Shopify Product Page Improvement</b>	Practice project focused on product page layout, CTA visibility, trust elements, mobile responsiveness, and speed/CRO checklist.
<b>SaaS Landing Page</b>	Responsive landing page concept with hero section, features, pricing, FAQ, and contact CTA using HTML, CSS, and JavaScript.
<b>WordPress Security &amp; Performance Checklist</b>	Practice checklist for plugin hygiene, basic hardening, backup awareness, speed audit, and redesign recommendations.

## EDUCATION

### FPT Jetking — Cyber Security & Network Administration

Relevant learning: networking fundamentals, Windows Server/Active Directory basics, cybersecurity fundamentals, troubleshooting mindset

## STRENGTHS

- Fast learner with a strong willingness to work on real client projects.
- Careful with task execution, testing, documentation, and communication.
- Comfortable using AI-assisted workflows to learn faster while still checking output manually.

## AVAILABILITY

Available for remote fresher/junior Frontend or Shopify Developer roles. Open to test tasks, part-time, project-based, or entry-level remote opportunities.
